

REWILD YOUR WORLD

Picture a city where barren urban spaces are transformed into thriving green oases. Rewilding isn't just about mending the past – it's about sowing the seeds of hope for the future. Nature has an incredible capacity to heal herself, but every now and then, she needs a little nudge. That's where you come in.

Term 1

Theme: Sustainable Futures

What You'll Be Doing:

- **Planting Seeds:** Get your hands dirty by designing and building spaces for native plants, edible produce and other greenery.
- **Collaborating with the Community:** Work alongside local communities to help bring a shared vision to life
- **Consulting Plant Experts:** Learn from specialists about the best plants to use for rewilding.

What You'll Gain:

- **Knowledge:** Gain deep insights into sustainable rewilding and urban greening.
- **Skills:** Develop practical skills in horticulture and environmental planning.
- **Community Engagement:** Build connections with community members and local officials.

What We'll Create:

- **A Thriving Green Oasis:** Turn urban areas into vibrant green spaces that become havens for native plants and wildlife where the community can reap the rewards and the fruits of your input. These areas will serve as a crucial refuge for pollinators and a source of biodiversity in the city.
