

TRASH TALK

Talking trash is no longer dirty – it's the future! As part of this project, you'll lead the charge in transforming how we manage waste through the lens of the circular economy. You will drive behavioural change by working with your team, industry experts, and our Youth Inc. people to create a cleaner, greener community.

Term 2

Theme: Sustainable Futures

What You'll Be Doing:

- **Collaborating with Industry Experts:** Learn from industry experts about the relationship between waste and the circular economy.
- **Working with Local Council and Recycling Centres:** Partner with local authorities and waste management facilities to implement effective recycling programs.
- **Connecting with Other Schools, Offices, and Businesses:** Share best practices and collaborate on joint initiatives to maximise impact.

What You'll Gain:

- **Expert Knowledge:** Learn from industry experts about advanced waste management and recycling techniques.
- **Practical Skills:** Develop skills in project management, teamwork, and effective communication.
- **Community Leadership:** Build your leadership capabilities by driving significant environmental change within your community.

What We'll Create:

- **A Robust Waste Management Plan:** Develop a comprehensive plan that enables our community to recycle and reuse effectively, and reduce kitchen waste in landfill.
